

Solaires Announces Strategic Partnership with NGK Insulators to Advance Sustainable Energy Solutions

Solaires Team | Victoria, B.C | November 15th, 2024

Solaires is thrilled to announce a groundbreaking partnership with NGK Insulators, a global leader in innovative energy solutions. This collaboration will integrate NGK's cutting-edge EnerCera battery with Solaires' high-performance perovskite solar technology to create a next-generation power solution that harnesses both indoor and outdoor light sources.

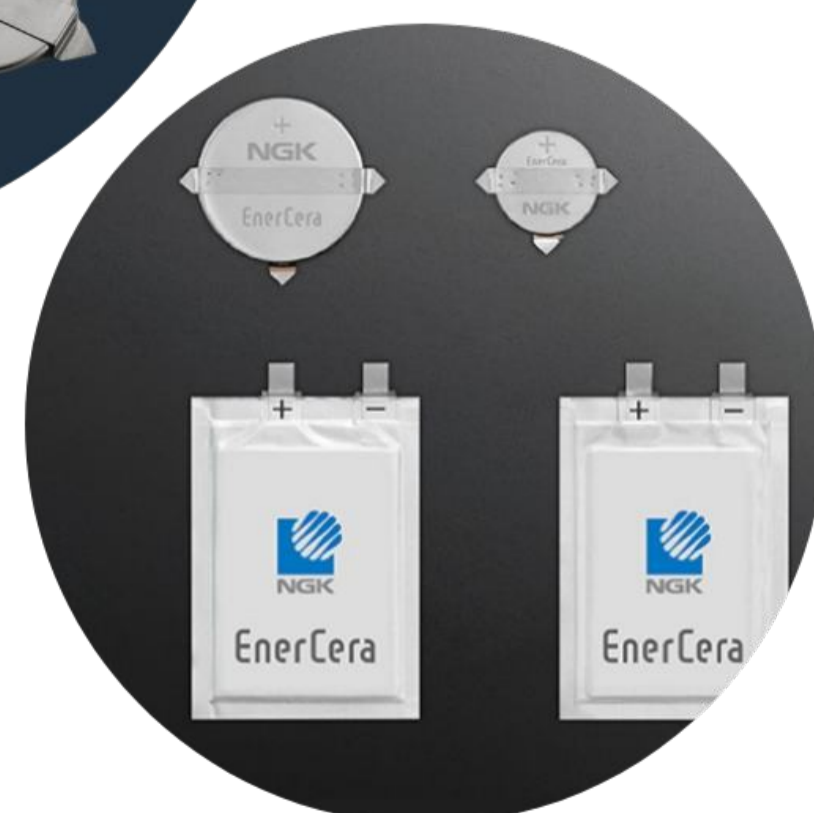

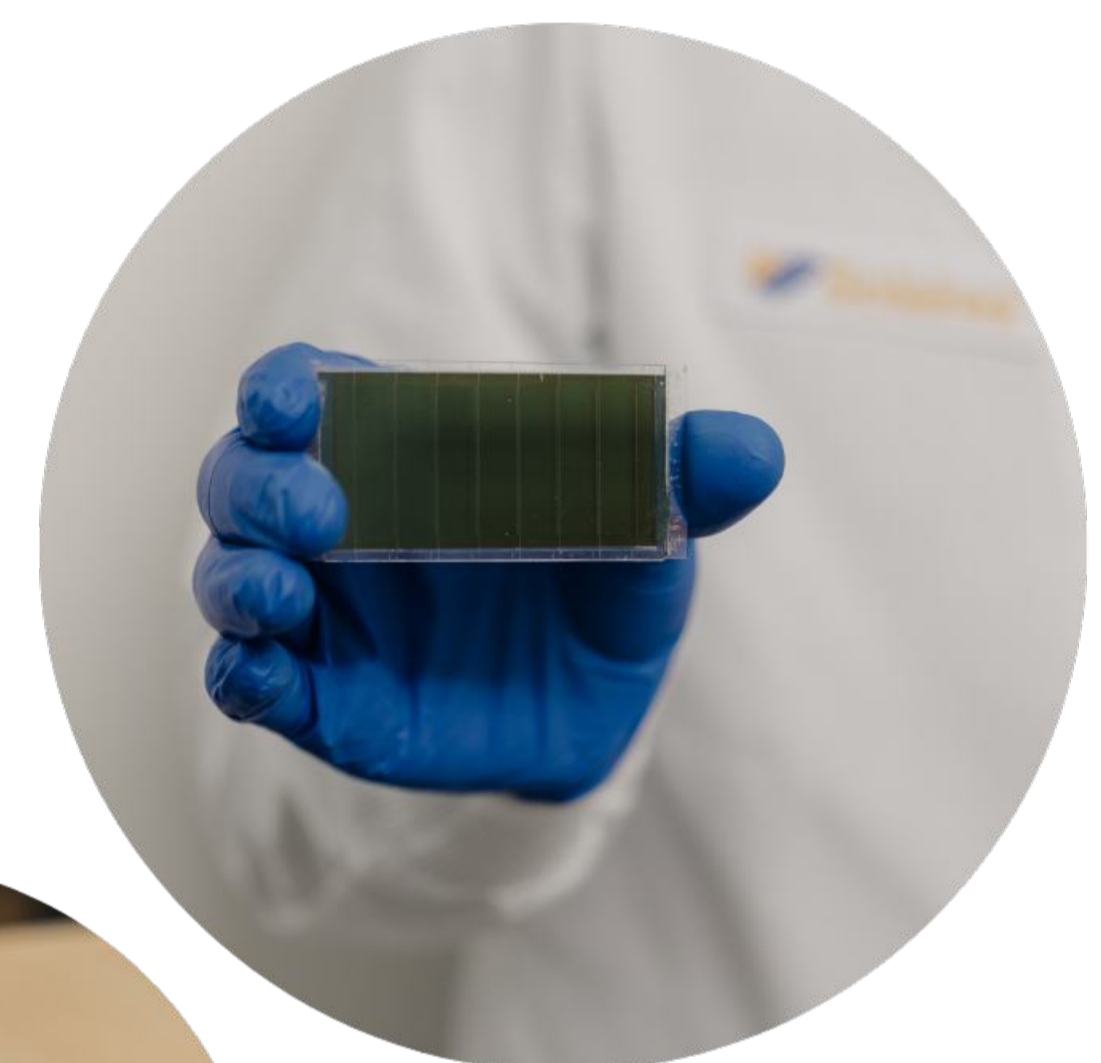

The EnerCera battery, celebrated for its exceptional energy density, compact design, and high reliability, is an ideal match for Solaires' innovative solar modules. Together, these technologies offer a seamless solution for energy generation and storage, providing a reliable, sustainable power source suitable for a variety of applications—from smart home devices and consumer electronics to industrial maintenance-free IoT applications. By combining NGK's battery expertise with Solaires' photovoltaic innovation, the partnership aims to push the boundaries of what's possible in renewable energy and portable power.

With global challenges in energy sustainability becoming increasingly urgent, the Solaires-NGK partnership represents a timely collaboration that supports both companies' commitments to creating clean, practical, and impactful energy solutions.

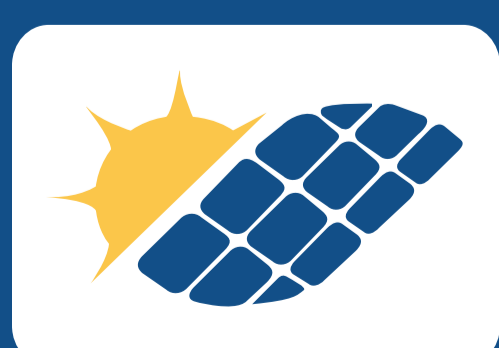

About Solaires

Solaires Enterprises Inc. is a Canadian cleantech company focused on advancing solar technology with light, thin, and efficient solar modules. With applications in both indoor and outdoor environments, Solaires' products drive sustainability across various industries.

About NGK Insulators

NGK Insulators, Ltd., a Japanese company, is renowned for its development of advanced materials and energy solutions. The EnerCera battery is part of NGK's portfolio of products aimed at providing sustainable, high-performance energy storage.
